Oracle Installation

To install the Oracle database on your computer, you need to download the installer from the download page of the Oracle website.

After having the installation files in ZIP format, you need to extract them into a specific folder on your computer.

The following picture shows the structure of the folder of the Oracle installation files after extraction.

Now you need to double-click the setup.exe file to start the installation process. There will be 9 steps that mostly automatically execute.

Step 1. The installer asks you to provide your email address to get the latest security issues and updates. You can ignore it by clicking the Next button:

Oracle Database 12c Release 1 Installer - Step 1 of 9

Configure Security Updates

Provide your email address to be informed of security issues, install the product and initiate configuration manager. [View details.](#)

Email:

Easier for you if you use your My Oracle Support email address/username.

☐ I wish to receive security updates via My Oracle Support.

My Oracle Support Password:

Because I didn't provide the email address, the Oracle database installer confirmed it, you just need to click the No button to continue.

My Oracle Support Username/Email Address Not Specified

You have not provided an email address.

Do you wish to remain uninformed of critical security issues in your configuration?

Step 2. In step 2, the Oracle installer asks you whether you want to create and configure a database, install database software only, or just upgrade an existing database. Because you install the Oracle database for the first time, choose option 1 and click the Next button.

Step 3. The installer allows you to choose the system class. Because you install Oracle on your computer, not a server, therefore, you choose the first option: desktop class and click the Next button.

Step 4. This step allows you to specify the Windows user account to install and configure Oracle Home for enhanced security. Choose the third option: "Use Windows Built-in Account".

Oracle Database 12c Release 1 Installer - Step 4 of 9

Specify Oracle Home User

Oracle recommends that you specify a standard Windows User Account (not an Administrator account) to install and configure the Oracle Home for enhanced security. This account is used for running the Windows Services for the Oracle Home. Do not log in using this account to perform administrative tasks.

☐ Use Existing Windows User

User Name:

Password:

☐ Create New Windows User

User Name:

Password:

Confirm Password:

The newly created user is denied Windows logon privileges.

 ☒ Use Windows Built-in Account

Help < Back Next > Install Cancel

Step 5. In this step you can (1) choose the folder on which Oracle database will be installed, (2) Global database name and password, (3) pluggable database name.

Oracle Database 12c Release 1 Installer - Step 5 of 9

Typical Install Configuration

Perform full database installation with basic configuration.

1

Oracle base: C:\app\ Browse...

Software location: C:\app\product\12.1.0\dbhome_1 Browse...

Database file location: C:\app\oradata Browse...

Database edition: Enterprise Edition (6.0GB)

Character set: Default (WE8MSWIN1252)

2

Global database name: orcl

Administrative password:

Confirm password:

☒ Create as Container database

3

Pluggable database name: pdborcl

Help < Back Next > Install Cancel

Step 6. The installer performs the prerequisite check

Step 7. The installer shows you the summary of the information such as global settings, database information, etc. You need to review the information and click the install button if everything is fine.

Step 8. The installer starts installing the Oracle database. It will take a few minutes to complete, depending on your computer.

You will see the Database Configuration Assistant window. Click the *Password management...* button to enter the password for Oracle database accounts.

Enter the password for SYS and SYSTEM accounts and then click the OK button.

Password Management

Lock / unlock database user accounts and / or change the default passwords:

User Name	Lock Account? ▲	New Password	Confirm Password
SYS			
SYSTEM			
AUDSYS	✓		
GSMUSER	✓		
SPATIAL_WFS_ADMIN_USR	✓		
SPATIAL_CSW_ADMIN_USR	✓		
APEX_PUBLIC_USER	✓		
SYSDBG	✓		
DIP	✓		
SYSBACKUP	✓		
MDDATA	✓		
GSMCATUSER	✓		
SYSKM	✓		
ORACLE_OCM	✓		
OLAPSYS	✓		
SI_INFORMTN_SCHEMA	✓		
...	...		

OK Cancel

Step 9. Once installation completes successfully, the installer will inform you as shown in the following screenshot. Click the Close button to close the window.
