Here the user will confirm the payment detail and will click on the continue so the payment will be made.

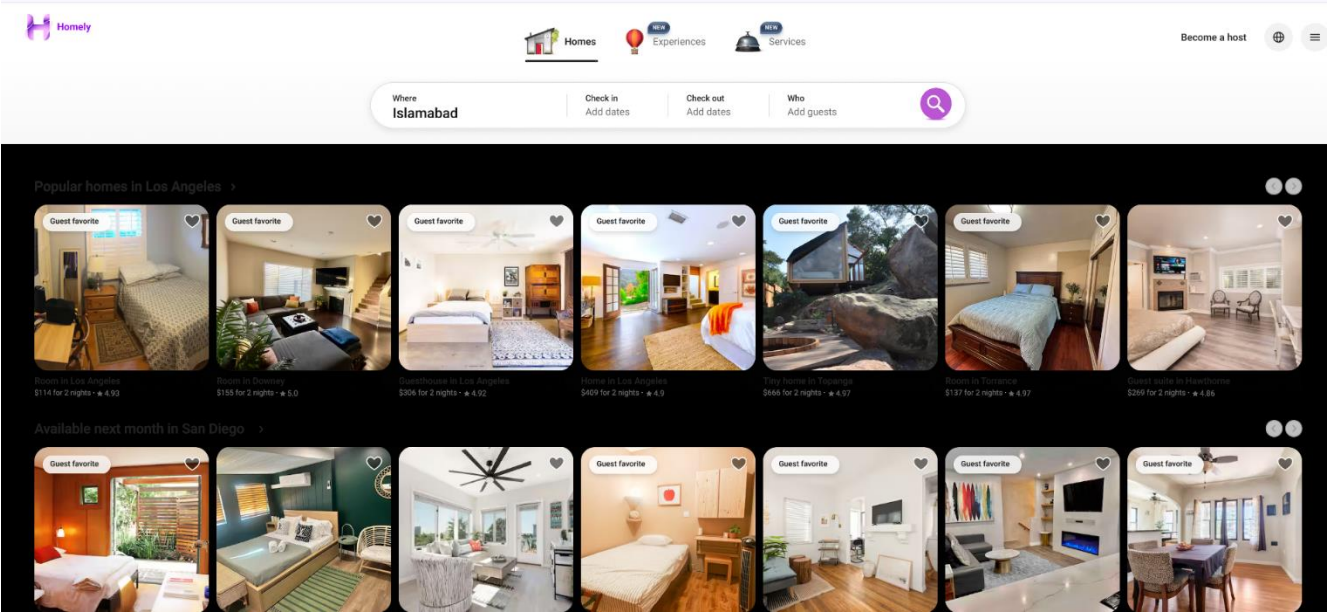

Payment Successful

Now if a user want to search a specific location to go for a trip, So I also add a search functionality

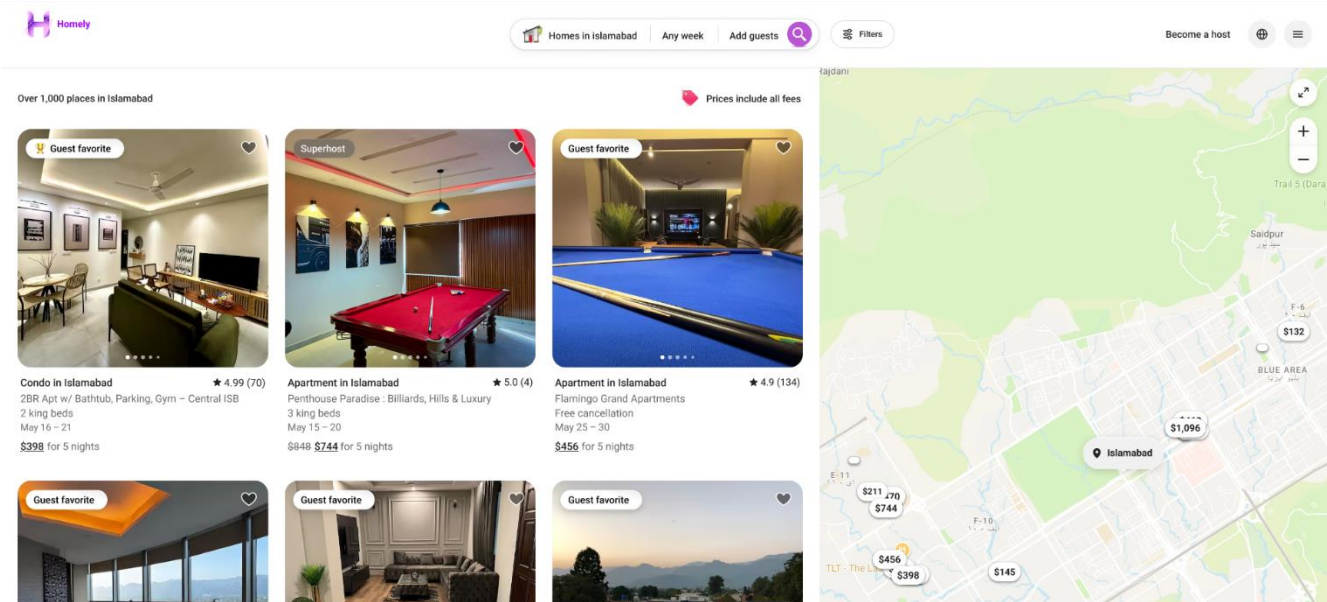

The user will select on the searchbar.

It will prompts the user to enter a location, the user will enter a location like I add Islamabad.

The user will click on the search icon, and all the details related to islamabad will be shown.

In Islamabad, I select an apartment in centauras so all the details is shown.

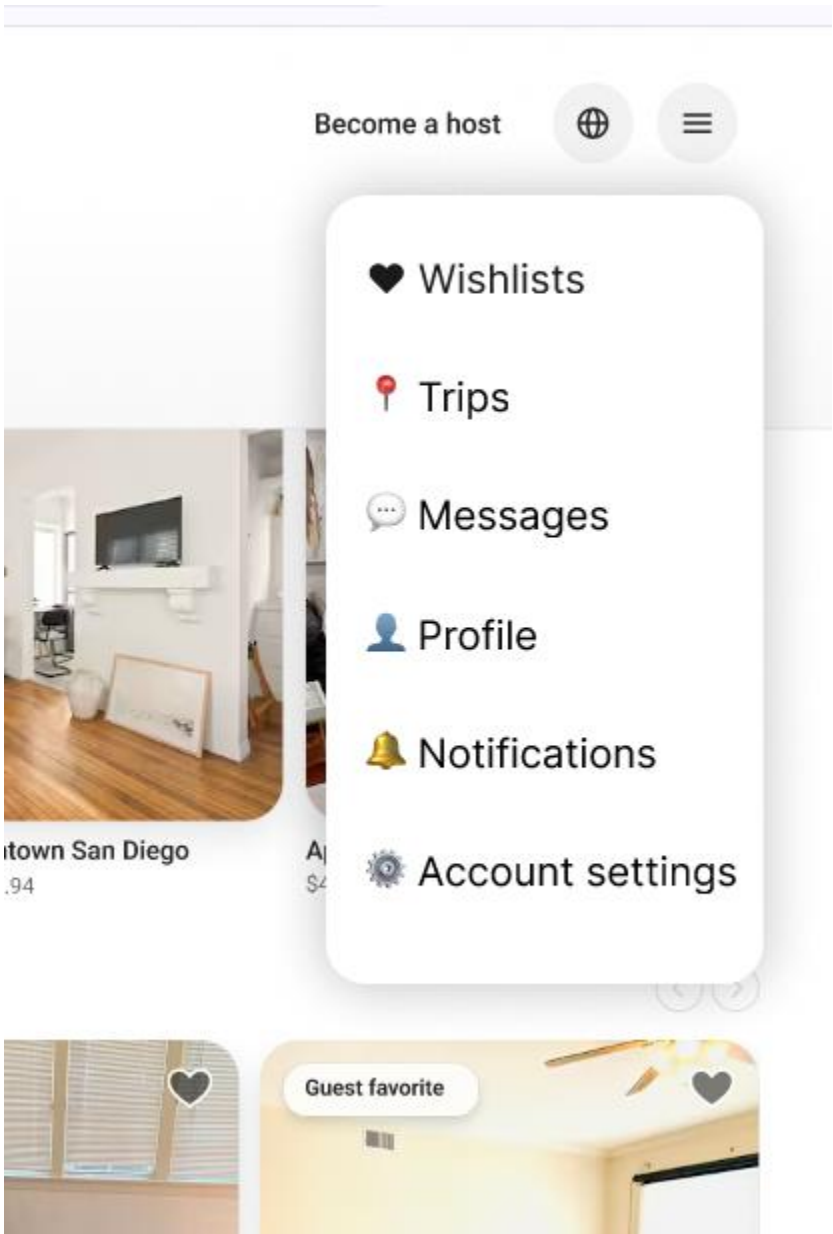

Here the payment information will be added and the user will click on next and payment will be confirmed.

Payment Successful

Another functionality is, if user select on the hamburger it will shows some points, if user click on that, user will land on that pages.

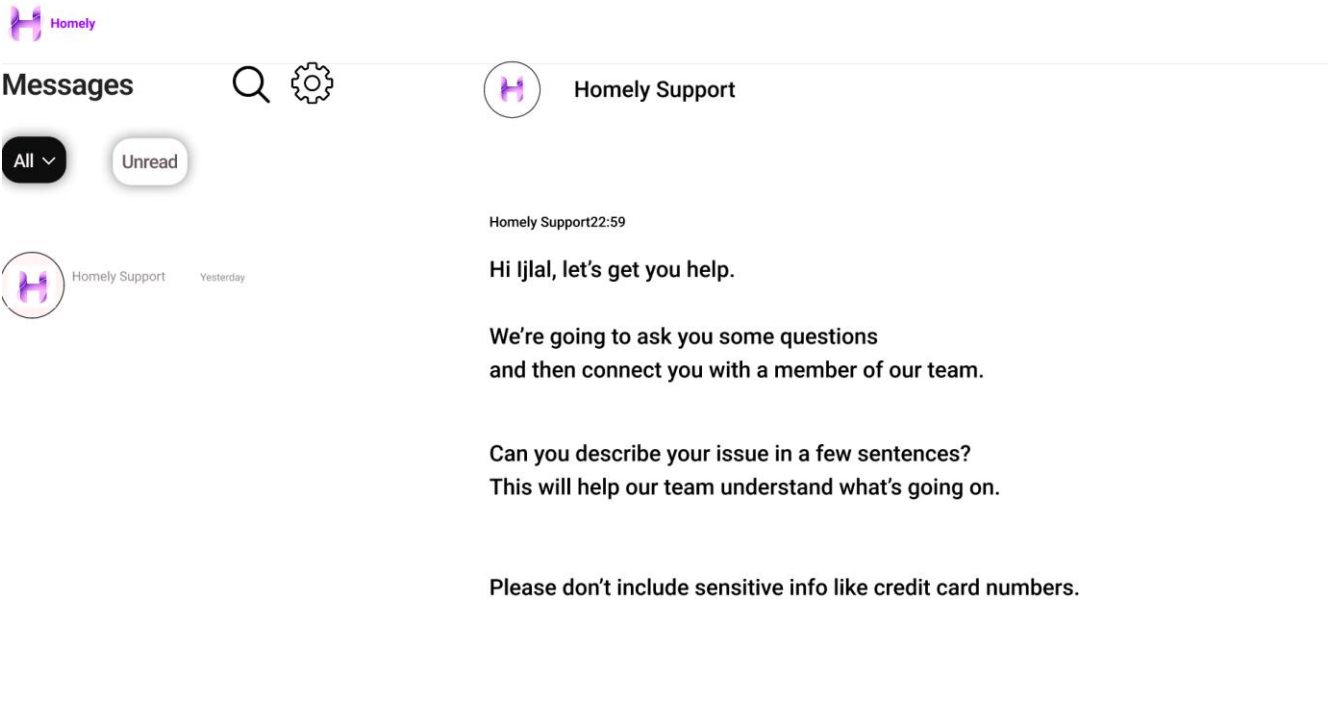

I also uses hover effects on these buttons.

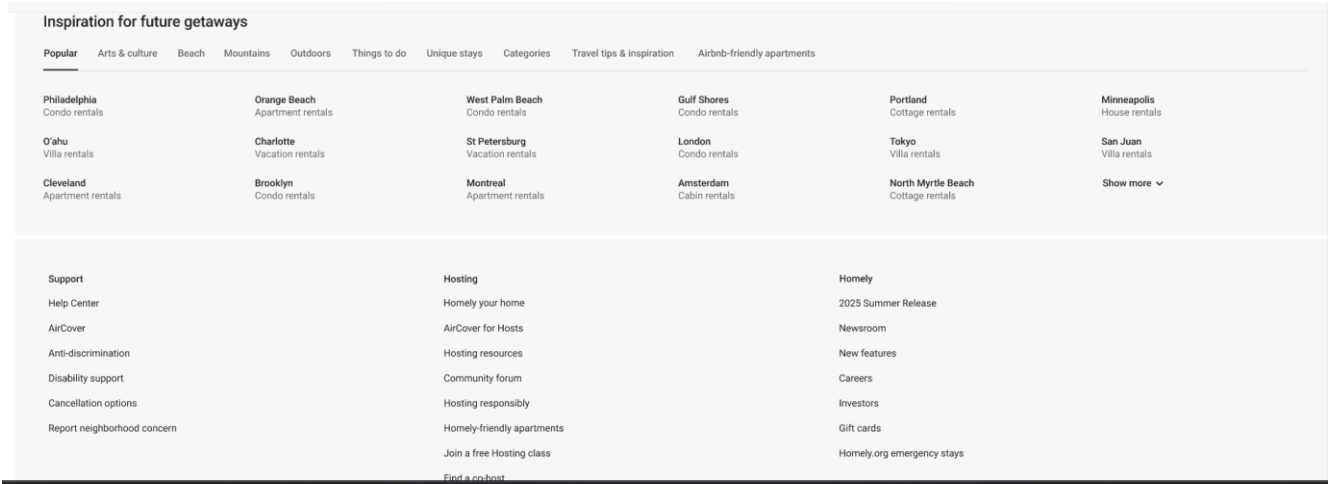

If user select on wishlist, user will land on this page.

If user select on message, user will land on Messages page.

IN footer

If user select on help center, user will come to help center page.
